# Revision

How do we actually do it?
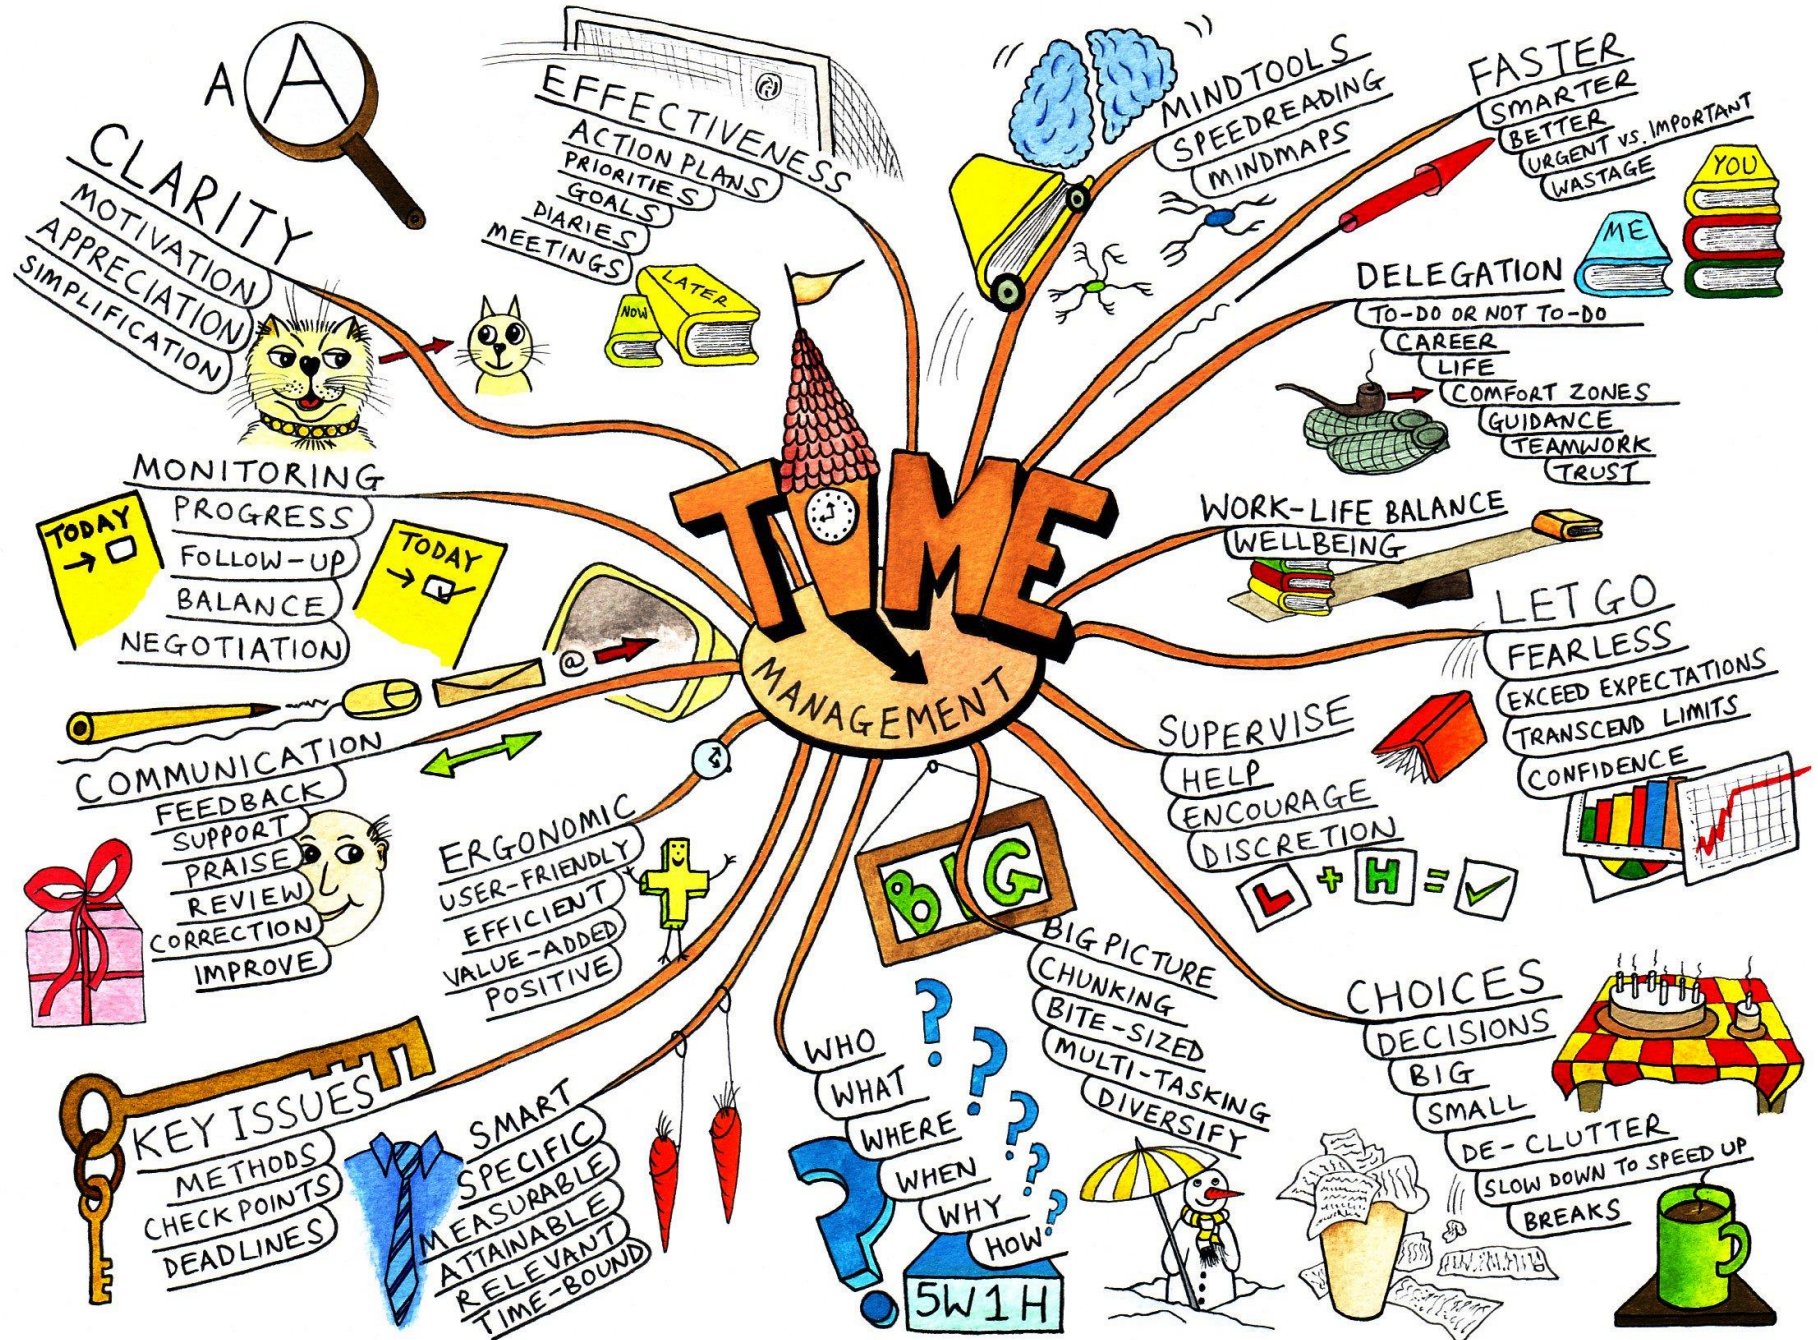

Week 1: Mind maps

Mind Maps- the theory

- Mind mapping is a way of linking key concepts using images, lines and links.

- A central concept is linked via lines to other concepts which in turn are linked with other associated ideas. ...

- Mind mapping uses the concept of **"radiant thinking"** – that is, thoughts radiate out from a single idea, often expressed as an image.

Mindmaps

This technique is best for visual learners (they tend to be creative/ artistic and learn best by remembering information that holds significance through its visual presentation.)

Mindmaps convey all the information on a topic with a colour coding system.

The making of the map is shown to be the most helpful, but people also like to hang these mindmaps around their revision space.
